

THE STREAMLINER

DELCO

TOP ANTENNA

NEW IN DESIGN • IMPROVED EFFICIENCY

MODEL 4144

FEATURES

MODEL 4144

- New type cowl insulator.
- Completely shielded beneath cowl.
- Easier installations—less chance of antenna ignition interference.
- Eliminates wheel static.
- No drilling of holes in top necessary.
- Can be used with all auto radio sets.
- Allows sufficient overhead room for clearance when driving into a garage.

List Price \$4.95

Two large rubber suction cups hold the Delco Streamliner to the top of the car. No drilling of holes in top necessary. Cowl insulator is assembled to antenna lead-in and

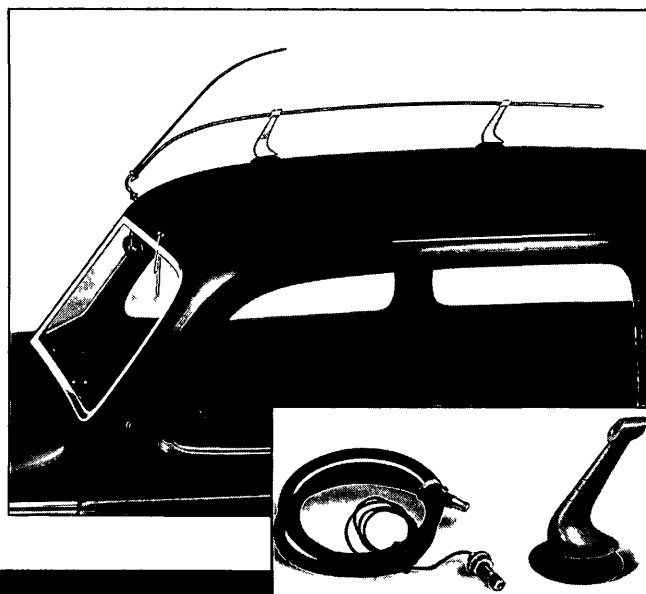

mounts through $\frac{7}{16}$ " hole drilled in cowl. All metal parts heavily nickled and chromium plated. Packed complete with lead-in cable.

MODEL 4145

This Streamliner Delco Top Antenna incorporates the same high quality and efficiency as the above antenna. It is designed for all cars with windshields that open such as 1937 Chrysler, Plymouth, Dodge, Ford and others. Only necessary to drill one $\frac{7}{16}$ " hole above windshield to install. Packed complete with shielded lead-in and top connector.
